

Fairyhouse Steel ISO 14001

4.2 Environmental Policy

Environmental Policy

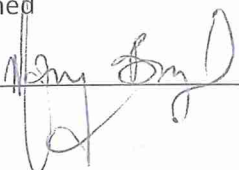

The following is the Environmental Policy of Fairyhouse Steel, Porterstown Lane, Ratoath. This document sets out the framework on which the company has based its Environmental Management Programme.

Fairyhouse Steel is committed to ensuring that no aspect of its business has an adverse effect on the environmental and that in running its day-to-day operations, all Environmental Processes and Procedures are continually monitored, reviewed and improved.

Fairyhouse Steel will:

- Comply fully with all relevant environmental legislation, regulations and codes of practice.
- Commit to the prevention of pollution on site through operations, and ensure that the waste management programme on site is fully assessed and implemented.
- Establish annual environmental targets that are both challenging but realistic. These will be communicated to staff regularly, along with progress reports at regular intervals, and reviewed every six months.
- When selecting suppliers, vendors and contractors, we will endeavour to choose partners with a proven track record of good environmental management.
- Employee suggestions for environmental management improvements will be reviewed by the EMS Team and implemented where appropriate.
- Fairyhouse Steel is committed to continual improvement of its management systems and actions taken to prevent pollution.
- Regularly review and update our environmental management procedures in order to ensure that we remain leaders in our profession in terms of environmental management. This will take place during the Management Review.
